**EXPENDITURE ACCOUNT:** \_\_\_\_\_

---

**HISTORY/FACTS/ISSUES:**

The Board approved the contract with Kimley-Horn and Associates (KHA) to conduct a preliminary engineering study (PES) of C 462E from CR 209 to C-466A in April 2010.

KHA completed the PES for C 462E on April 27, 2011; Public Works is submitting it for final BOCC approval. The preferred alternative recommendation has been presented to the community and the LSMPO Technical Advisory Committee. The overall recommendation is for an enhanced 2 lane, or 3 lane section that eliminates the off-set intersections with US301 and provides safer conditions along the road. KHA presented a powerpoint briefing on their study and recommendations at the March 15th, 2011 BOCC Workshop. The PES document and technical analysis is available for review at the Sumter County Public Works Department and provided separately for the Commissioners. An overview summary of the project and recommendations is attached.

The County Administrator and staff are recommending Board approval of the study and recommendations contained therein.

Attached: C462 PES Study Overview.
